Key Knowledge

The internet is the worldwide network of computers and other digital devices connected by cables. The internet is a physical thing, you can touch the internet!

The World Wide Web is the data of the web pages which is transferred across the internet so web pages can be viewed. You can't touch the World Wide Web!

The infrastructure of the internet also enables data to flow for other internet services such as email, video calls, video streaming, games and lots more!

Year 4: Computing
Autumn 2
Networks – The Internet

Key Vocabulary

Computer network
Internet
Wi-Fi
Router
Server
Data
Green Screen
Connection
Online
Adobe Spark
Video
Network
LAN (Local Area Network)

Learning questions

L1 – What is a computer network and how and why are computers are networked?

L2—Can I create a human model of the internet?

L3— Can I explore using a green screen app?

L4—Can I plan a project for a green screen app?

L5— Can I make a film using a greenscreen app?

L6— Can I refine my work? Can I evaluate and share my work?
